

## 1. Managing Dentists & Patients

- The Office Manager can register new dentists, adding their name, contact details, and specialization.
- They can also register new patients, storing their personal and contact information.

## 2. Handling Appointments

- Patients can request an appointment either by calling or filling out a form online.
- The Office Manager reviews requests and books appointments for patients.
- Once booked, both the dentist and patient receive a confirmation email.
- Patients can log in to check their appointments and even cancel or reschedule if needed.

## 3. Dentist's Schedule

- Dentists can log in to see their upcoming appointments along with patient details.
- To keep things manageable, each dentist can have a maximum of 5 appointments per week.

## 4. Surgery Locations

- The system keeps track of all dental surgery locations, including their name, address, and contact info.
- Every appointment is tied to a specific surgery location where the dentist will see the patient.

## 5. Billing & Payments

- When a patient receives treatment, a bill is generated for their appointment.
- Patients with unpaid bills won't be allowed to book another appointment until they settle their dues.
